DBDOC

for your ABB® Symphony Harmony / INFI 90® System

DBDOC – From G. Michaels Consulting Ltd

Fifty years of experience with process control system software upgrades and solutions have given G. Michaels Consulting Ltd a unique perspective on the industry.

We created DBDOC in 1996 to address our clients' needs for a troubleshooting and documentation tool for INFI 90® systems, one that would provide a comprehensive view of the disparate system resources in process control systems. DBDOC is a full-featured product that has garnered an enthusiastic response among DCS system users worldwide. Recently, we have expanded DBDOC to also support AC 800M systems.

Our Clients

Thousands of satisfied clients in twenty-one countries use DBDOC in a wide variety of industries and configurations. If you are considering DBDOC for your operation, please contact us. We would be happy to put you in touch with DBDOC customers with systems similar to your own. For a current list of our clients, visit www.gmcl.com.

Service and Support

As a small company, G. Michaels Consulting Ltd can provide fast, personalized service to our clients and customers worldwide. We look forward to working with you.
